

Plastic Prep

6428SP/01

6428SP/01 Plastic Prep is a multi-use product developed as a plastic cleaner that removes contaminants, such as mold release agents.

6428SP/01 Plastic Prep can be used on a variety of static-prone substrates, such as fiberglass, acrylic, and PVC.

6428SP/01 Plastic Prep can also be used as an anti-static agent for preparing a substrate for digital printing.

Features:

Packaged ready for use
 Multi-use.....
 Alcohol based.....

Benefits:

No mixing; Consistent results
 Versatile; Less inventory
 Reduces static charge; Cleaner paint jobs

Directions for Use

6428SP/01 Plastic Prep:

Cleaner for Plastics and Flexible Parts:

6428SP/01 quickly removes troublesome silicones and mold release agents from the substrate to be painted. Saturate a clean white cloth, wipe in one direction only, and immediately dry with a clean cloth. Use 6428SP/01 before and after sanding.

Important: Do not wipe over sensitive substrates such as fresh topcoats and/or primers as softening may occur.

Caution: Do not over-apply to laser-cut substrates, otherwise crazing may occur.

Anti Static Agent:

Using a spray gun or mist bottle, apply a mist coat of 6428SP/01 on the surface to be painted. This will help reduce static electricity on all treated surfaces, minimizing the attraction of dust and dirt particles.

Technical Data:

Color	Clear
VOC lbs./US gal.	6.5 VOC
