## **Matthews Paint introduces EZ Spray Professional Paint Delivery System that enables the quick and easy repair of scratched or damaged signs.**

DELAWARE, OH, April 15, 2016 – Matthews Paint has launched the EZ Spray Professional Paint Delivery System. Available in both MAP Conventional/SVOC and MAP Ultra Low VOC, EZ Spray's 2-component technology comprises Matthews paint and hardener in one can. The hardener is integrated in a separate cylinder in the can and is released when the drive pin punctures the cylinder. No field mixing is required.

"With the EZ Spray System, any Matthews Paint formula available today can be loaded into the can, making it ideal for repairs in the field," stated Jan Scheske, Manager of Marketing and Customer Service at Matthews Paint.

This aerosol system allows you to mix paint for the job and use the same mixed color for touch-up in the field. The result is reduced operational costs and an increase in small quantity sale profits. With its compact design (about the size of a coffee maker) the filling system requires minimal counter space. The aerosol filling system is safe, efficient and waste-free to operate. Filling only starts with complete closure of a metal shatterproof door. The mixed custom color or clear is injected into the aerosol can in one powerful movement with no loss of paint.

Theoretical transfer efficiency is 30% better than conventional spray equipment resulting in four times the pot life of conventional spray process. EZ Spray is 6H compliant and coverage is 8-12 sq. ft. @ 2 mil per can. For complete information, including instructional videos, visit [MatthewsPaint.com](http://MatthewsPaint.com).

*EZ Spray is for professional use only and requires the use of standard personal protective equipment. EZ Spray is formulated for use with Matthews Paint only. This product is not intended for use within the state of California under CARB's Regulation for Reducing Volatile Organic Compound Emissions from Aerosol Coating Products.*

#### **About Matthews Paint**

For over 80 years, Matthews Paint has manufactured the highest quality of industrial coatings for their customers. As a major supplier to the architectural signage industry, Matthews Paint works with fabricators, designers and architects in coating technologies and color development including a library expanding to more than 80,000 colors. Matthews Paint continues to lead the industry with environmentally-minded products while maintaining high standards of performance.
